

Keycaps for MX Series Keyswitches

UMD Model KT Series

The UMD **KT Series** of Keycaps are *Relegendable* keycaps that are suitable for use with any keyboard using Cherry MX compatible style "Cross Point" keyswitch modules, as used on the UMD, Tipro and Keysource keyboards.

Keycap legends can simply be printed on colour paper and inserted under the removable lens or Cover.

The *KT Series* are available in a 1x1 (Single), 1x2 (Dual) or 2x2 (Quad) format. The Dual keycap is designed to sit over 2 MX keyswitch modules, while the Quad keycap is designed to sit over 4 MX keyswitch modules in a 2 x 2 format.

A complete Keycap assembly comprises of a **Frame** which is the main body of the keycap and sits over an MX style keyswitch. A **Cover** is then placed over the Frame to complete the assembly. Covers can either be transparent to enable a legend insert (eg. paper square) to be inserted in between the Cover and Frame for custom legending, or Covers with specific pre-printed legends can be ordered.

UMD's *Technical Standard 117* details the **Legend Codes** that can be used to identify the legends. Both Frames and Covers can be ordered in any color combination as defined by the **Color Code**.

The table below provides ordering details on how to specify UMD KT series keycap components.

UMD's home page (www.umd.com.au) provides details of stock lines.

Features

- Relegendable Keycaps
- Removable clear lens
- Available in Single, Dual and Quad key arrangements.
