

# UMD Print Workstation

Your labels, your way, on demand.

In today's fast moving workplaces, businesses require labelling tools that keep up with demand. Unique Micro Design's (UMD) Print Workstation, a label printing solution, is designed to streamline your labelling workflow, with speed, accuracy and simplicity. Developed for use on Honeywell PC45 desktop printers, Print Workstation is fully stand-alone; no host PC required and can operate completely offline.

The PC45's touchscreen allows users to easily select a pre-loaded template, enabling users to quickly print labels on demand. Using Print Workstation, reprint labels with ease and edit variable data fields, such as product name and shipping details.

Print Workstation delivers a powerful and simple approach to label printing, purpose-built to enhance productivity and support the evolving labelling needs of your business.

## UMD Print Workstation Features:

- **Professional results every time:** The Honeywell PC45 Desktop Printer comes installed with UMD Print Workstation software.
- **No host PC required:** Operates stand-alone, offline.
- **Customisable and adaptable:** Add custom text, or time stamps to the templates via the touchscreen.
- **Fast and simple:** Select a template and print labels right from the screen in seconds.
- **Plug and play flexibility:** Connect a keyboard to speed up entry of custom text into the templates.
- **Crisp image printing:** Add black and white images or logos to labels.

## Ideal Applications:

- Food catering and container labels
- Visitor badges
- Shipping labels
- Vial labels
- Gift name labels

## Honeywell Edge Service Contract Gold

- 3 year maintenance contract: 5 day depot repair, 48 hour onsite response time.
- Repair or replacement of damaged components.
- Optional: Service Add-on: Printhead Replacement.

## UMD Support

- UMD's Technical Support Team can assist with printer set up, implementation, after sales support and service agreements.

# Case Study: Software Development For Food Catering

A client within the food catering industry required an on demand printing solution for labelling their food containers with essential details, food name, ingredients, allergens and production/expiry date. UMD's Technical Services Group developed custom food labels tailored to the client's requirements on dissolvable labels.

Print Workstation was installed on the Honeywell PC45 Industrial Barcode Label Printer, allowing the client to use the printer directly, replacing the need for a host PC/Print Server. This solution enabled the client to quickly select a food item on the printer and effortlessly print labels for their containers, streamlining their production process and ensuring compliance with food labelling standards.
